Sponsoring Information

The Conference

The Security Forum is the Hagenberger Kreis' annual ICT security conference addressing current issues in this domain. Traditionally, it takes place on two days in spring. On both days visitors are offered technical as well as management-oriented lectures by representatives of business, research and public service.

We are happy to welcome over 300 participants from various ICT security related companies in Austria, Germany and Switzerland, as well as international guests and lecturers.

The first Security Forum in 2003 proved to be a great success for our sponsors, our partners and the Hagenberger Kreis. Over the years the Security Forum has distinguished itself through the presence of renowned lecturers, domestic as well as from abroad. We are proud to have welcomed Prof. Louis Marinos (ENISA), Prof. Reinhard Posch (CIO of the Federal Government of Austria), Prof. Edward Humphreys ("father" of the ISO/IEC 27000 family), Prof. Vincent Rijmen (co-inventor of the AES encryption algorithm), Sharon Conheady (First Defense Information Security), Shimon Gruper (Aladdin) and Oberst dG Walter Unger (BMLV Abwehramt) among many others. The host provides refreshments and catering on both days. The first day ends with a pleasant soiree.

Audience

With this event we wish to appeal to IT-leaders, security managers, security researchers, managing directors of SME's, system administrators, and of course anyone who is interested in the offered talks.

Date and Location

The Security Forum will take place on 19th and 20th of May 2027 at the University of Applied Sciences Upper Austria, Campus Hagenberg.

The Host

Founded in March 2002 by students of the "Computer and Media Security" degree program at the University of Applied Sciences in Hagenberg, the Hagenberger Kreis is dedicated to fostering Hagenberg as a place of study and leisure, and—more importantly—to furthering ICT security awareness in public.

Sponsoring
